📄 SUMMARY

Dynamic Cybersecurity Professional with 6+ years of experience in Red Teaming and Offensive Security. Licensed Electrical Systems Expert with strong expertise in securing both physical and digital infrastructure. Proven in developing custom security tools for Android and Windows platforms.

2017 INSA summer camp joined and graduated

Holding 7+ industry certifications and ranked in the top 5% on TryHackMe, I bring a strong offensive security mindset combined with deep practical knowledge in **Networking (Cisco Routers & Switches), Server Administration (hardware & software), Biometric Systems & Camera Installation, Digital Device Maintenance, and full physical-digital infrastructure security.**

🧠 SKILLS

Cyber Security | Offensive Security | Network engineer | Full-stack Developer | Network Administrator

- Offensive Security: Red Teaming, Penetration Testing (Web, Mobile, Network), EDR Evasion
- Application Security: Manual Code Review
- Networking & Infrastructure: Cisco Routers & Switches, Server Administration (Hardware & Software)
- Physical Security: Biometric Systems, CCTV & Camera Installation, Digital Device Maintenance
- Automation: Python, PowerShell
- Compliance: FedRAMP, NIST, SOC2

🌐 LANGUAGES

English

Amharic

📁 PROFESSIONAL EXPERIENCE

Self Employee

Cyber Security, electrical Installation

2019 – Present | Addis Ababa, Ethiopia

- Offensive Security: Red Teaming, Penetration Testing (Web, Mobile, Network), EDR Evasion
- 2017 INSA summer camp joined and graduated
- Networking & Infrastructure: Cisco Routers & Switches, Server Administration (Hardware & Software)
- Physical Security: Biometric Systems, CCTV & Camera Installation, Digital Device Maintenance
- Automation: Python, PowerShell

PROJECTS

PDAT (phishing detection and analysing tool) and more 3 main projects

Malicious URL & File Detection – Analyze URLs, files,
and email content for phishing or malicious intent.

2025 – 2026

AI-Based Analysis – Uses large language models for
context-aware detection.

Keyword-Based Analysis – Lightweight detection for
fast and simple checks.

Knowledge Section – Built-in phishing awareness with
Q&A for educational purposes.

WAF Protection – Monitors abnormal activity such as
brute force, dictionary attacks, fuzzing, DoS/DDoS, and
blocks suspicious IPs for 20 seconds.
